

Our commitment to the environment

Protecting the environment is in everyone's interest. That's why COMPCO is committed to minimising waste by recycling and preventing or reducing pollution. For example, a recent review of our transport has significantly reduced CO² emissions.

By continually improving systems throughout the company, we aim to enhance our sustainability for the mutual benefit of the environment, clients, and public alike.

Ready when and where you are

Working within many markets, from retail, warehousing, waste-recycling facilities, and industrial units, to schools, hospitals, and residential properties, COMPCO can commit equally to projects of any size and sector. Moreover, with broad experience in all fire protection technologies, including modern systems such as water mist sprinklers, we will make sure you benefit from the most suitable solution for your needs.

Choose COMPCO and you join a long list of clients that have selected us to protect them from fire. These include landmark locations such as the British Museum, Royal Ascot and the Millennium Stadium, and blue chip companies such as IBM, IKEA, Honda and Rolls Royce.

Whatever your needs, budget and project requirements, when selecting a fire-protection provider, it makes sound business sense to speak to COMPCO.

Comprehensive fire protection solutions

COMPCO offers complete nationwide fire protection solutions, from consultancy to design and installation. Our portfolio of products and services includes:

- Automatic sprinkler systems
- Water mist systems
- Gas suppression
- Hydrant mains
- Wet and dry risers
- Detection and alarms
- Service and maintenance
- 24 hour emergency call out
- **Private sector:** Retail, supermarkets, warehousing, pharmaceuticals, food processing, manufacturing and industrial complexes
- **Public sector:** Schools, universities, student accommodation, theatres, museums, libraries, fire stations, hospitals, care homes, residential units and tower blocks
- **Special risk schemes**

Leave nothing to chance

Excellence in fire engineering

As the UK's largest privately owned fire-engineering company, COMPCO sets the standard in protecting businesses throughout the country from fire. With over 20 years' heritage in the sector, COMPCO has the expertise, resources, and financial stability required to meet the needs of clients and projects of any scale.

However, it's our individual approach that clients value most. From project-managed installation to servicing and maintenance, we can tailor our services to the exact requirements of your project. Our presence in four regional centres also means we are conveniently close to rapidly deal with your needs. So, whether you require sprinkler systems within schools or gas suppression for computer suites, you can rely on COMPCO to provide you with a quality, yet competitively priced, package of solutions and support.

Committed to quality

- Approved to Level 4 by the Loss Prevention Certification Board (LPCB) LPS 1048 - 1
- Qualified to design and install to BS EN 12845, National Fire Protection Association and Factory Mutual Global Rules
- Certified to ISO 9001 for Quality Management System
- Compliant with all relevant Health and Safety regulations
- All materials meet requirements of governing bodies

cost effective and reliable solutions

Setting the standard in fire protection

When it comes to protecting your people and property, it doesn't matter whether you're a fire-protection expert or you require the assistance of one. You want a provider you can trust to complete the project within budget and without fuss.

This straightforward approach has earned COMPCO an unrivalled reputation for making life easy for clients.

Through our commitment to adapting to clients' needs, since we were founded in 1988, COMPCO has grown to become the UK's largest privately owned fire-engineering company.

Putting the right team in place

At COMPCO, we appreciate that no two environments or clients are the same. So neither are our services. Our experienced engineers and support staff based in four regional offices are ready to deliver the right package of support and services for your project.

This offering extends to acting as the principal contractor on your project.

We provide a full turnkey service, from design, obtaining planning permission and co-ordinating other trades on site, to handover.

Should you require this service, you can feel sure our Construction, Design and Management (CDM) trained engineers have the knowledge required to run your project smoothly.

What's more, with the largest directly employed workforce of any UK fire-protection company, you can relax knowing we will always assign the most suitable people to your project. As we employ your project team directly, unproven sub-contractors will never be present on your sites.

Forging the perfect partnership

When dealing with the responsibilities of your role, finding a partner that can ease your burden is essential. That's where COMPCO comes into its own. As a privately owned company, we can make rapid and effective decisions without worrying about shareholders or consulting a parent company.

This means, not only will we react quickly, we can adapt and respond intelligently to unexpected events.

Responding rapidly to your needs

Nationwide coverage means more than travelling miles across the country. Serving all locations equally well demands reaching sites quickly.

With four regional centres, COMPCO offer the abilities of a major contractor, with the convenience of a local supplier. So, when decisions on site need to be made quickly, we are there.

Maintaining your protection

Staying protected and compliant means ensuring your fire-protection system remains in perfect working order.

Annual maintenance contracts from COMPCO will ensure your sprinkler installation operates seamlessly and continues protecting your organisation. With comprehensive status reports supporting your maintenance contract, you'll know your system is consistently protecting you from the risk of fire.
